INTRODUCTION

- A Software Engineer with 2 years of experience in varied businesses solving design, development & operational problems at the job consistently delivering end-to-end solutions for my roles, also led a team in the last stint.

WORK EXPERIENCE

StartupHire   **(6 Months)** Aug. 2023 – Jan. 2024
Founding & Lead Software Engineer   *Remote, United States*

- Job Board Integration: Successfully integrated popular job boards, expanding employers' reach to a wider candidate pool.
- Built ATS (Applicant Tracking System): Implemented an efficient ATS streamlining the recruitment process from job posting to candidate selection.
- Developed Recruitment Pipelines: Engineered customized recruitment pipelines, enhancing the management of candidates through various stages.
- Crafted Intuitive Recruiter Dashboard: Designed and implemented a centralized recruiter dashboard, optimizing the management of the recruitment process, including job postings and interview scheduling.
- Key Role in Startup Hire MVP: Finished developing the MVP for Startup Hire, contributing to its success in connecting companies with top talent globally.
- Global VC Pitching: Actively participated in pitching the Startup Hire MVP to multiple venture capital firms, garnering significant interest and potential investment.

Locus Connect   **(11 Months)** Sep. 2022 – July. 2023
Front End Engineering Intern (to) Full Stack & DevOps Engineer   *Hsinchu, Taiwan*

- Locus Portal Development: Created a portal application helping Locus clients to efficiently manage location tracking needs, configure floor plans, and manage Locus Hardware.
- Portal Server: Implemented robust file management, floor plan processing, and 3D-HDOP map generation capabilities on the portal server.
- Locus In-house Server Management: Oversaw the administration of in-house Ubuntu servers using Portainer and NGINX for container management across multiple services.
- 3D-HDOP Planner Integration: Successfully integrated a 3D-HDOP Planner Front-end into the portal, enhancing precision and planning capabilities.
- TWR Anchor and iOS App Development: Developed and presented the TWR Anchor and iOS App at INNOVEX 2023, Taipei, featuring automatic user data aggregation based on booth presence.
- Access to Taiwan (A2T) Support: Secured support from Access to Taiwan (A2T) for the INNOVEX 2023 exhibition, facilitating the project's success.

iNeuron.ai   **(3 Months)** Apr. 2022 – June. 2022
UX Design Intern (to) UI Developer Intern   *Bangalore, India*

- Prototyped Findcoder.io using Figma to enhance user interaction and overall UX.
- Established a Design System for the entire product line, promoting consistency and efficiency in UI design across multiple platforms.
- Crafted thumbnails and marketing assets for ineuron.ai courses, contributing to the engagement of over 10 million students.

PlusKlass **(3 Months)** Jan. 2022 – Mar. 2022

Technical Writing & Development Intern *Bangalore, India*

- Was a part of documenting course material including HTML, CSS, JS.
- Course was taken by over 5000+ students.
- Actively integrated code blocks for students to practice code inside the course material.

EDUCATION

National Yang Ming Chiao Tung University Jan. 2023 - July. 2023

Short-Term Research Scholar, Taiwan Experience Education Program *Hsinchu, Taiwan*

- As a part of my role at Locus Connect, a joint venture with NYCU.

Visvesvaraya Technological University Aug. 2018 - Sep. 2022

B.E, Electronics & Communications Engineering *Bangalore, India*
